## $\boldsymbol{\nabla}$ General description

-Light line and dot-free with wide emitting angle
-High CRI Ra>90, super bright 95~110LM/W
-Easy installation and maintenance
-2700K $\backslash 3000 \mathrm{~K} \backslash 4000 \mathrm{~K} \backslash 6000 \mathrm{~K}$

1.The tolerance of output data can be vary up to $5 \%$
2. The output data tested according to IES TM-30-15
3.The output data is based on IP20/1merter, data of 5 m in only for reference
4.IP protection process leads changes to size, CCT and luminous flux

## Connect Method

## $\nabla$ Precautions

※Please drive the led strip with 24VDC isolated power, and the ripple of the constant voltage source should be less than $5 \%$.
※Please do not bend the strip into an arc with a diameter less than 60 mm to ensure the longevity and reliability.
※Do not fold it in, it may damage LED beads.
※Do not pull the power wire hard to ensure the longevity. Any crash that may damage the LED light is prohibited.
※Please make sure the wire is connected to the anode and cathode correctly. The power output should be
consistent with the voltage of the strip to avoid damage.
※LED lights should be stored in dry, sealed environment. Please only unpack it before usage. Ambient
temperature: $-25^{\circ} \mathrm{C}^{\sim} 40^{\circ} \mathrm{C}$. Storage temperature: $0^{\circ} \mathrm{C}^{\sim} 60^{\circ} \mathrm{C}$. Please use the strips without waterproof within indoor environment with humidity less than $70 \%$.
※Please be careful during operation. Do not touch the AC power supply in case of electric shock.
※Please leave at least $20 \%$ power for the power supply during using to ensure there is enough power supply to drive the product.
※Do not use any acid or alkaline adhesives to fix the product (e. g. : glass cement).
